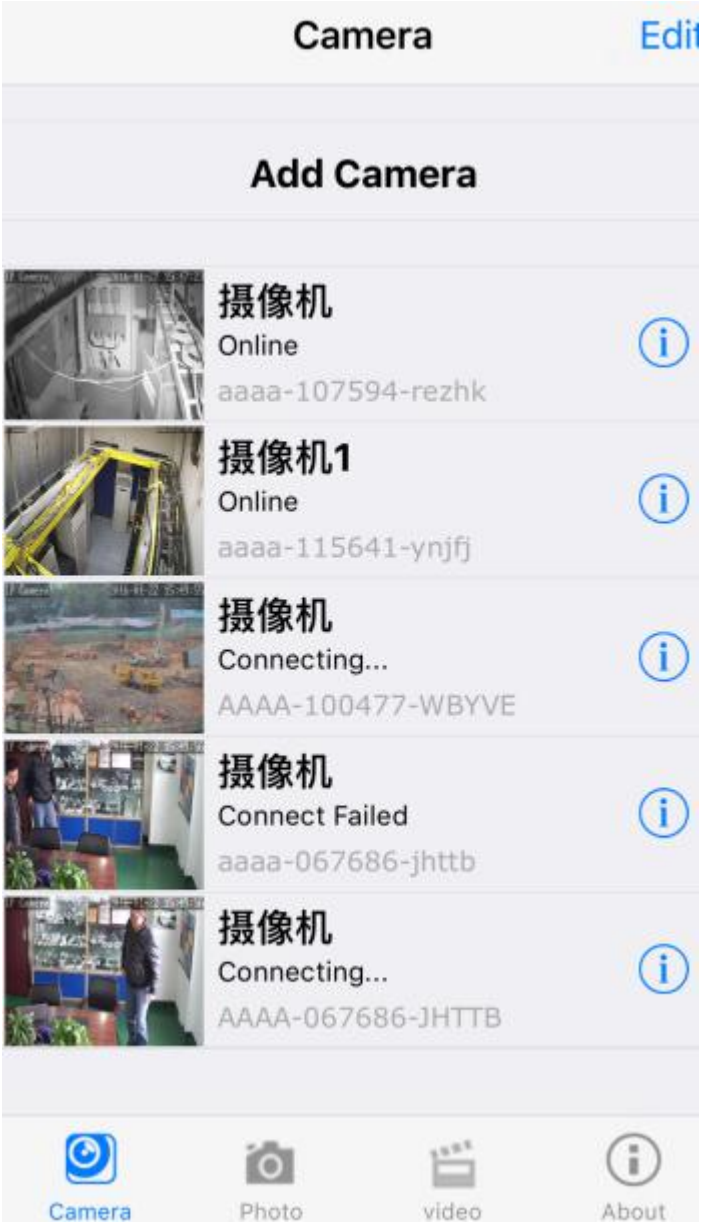
Step Five ： Back camera home page, click the camera can monitor the viewing screen. (As shown below)



Note 1: The camera settings method。 Click on the right side of the camera ， They can enter the camera setting page。(See below) can be set to change the password, timing video, audio settings, WIFI settings and so on.

WIFI setting allows the camera to connect local WIFI router, so the camera even on the Internet.

In the case of networked cameras: PC clients need to watch if our software can be installed directly, click on the search or direct add camera UID can be monitored. (Camera UID is a series of letters beginning AAAA + digital

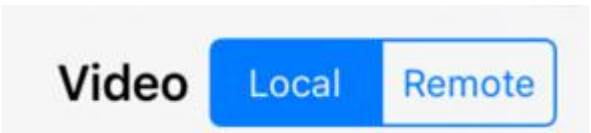
)

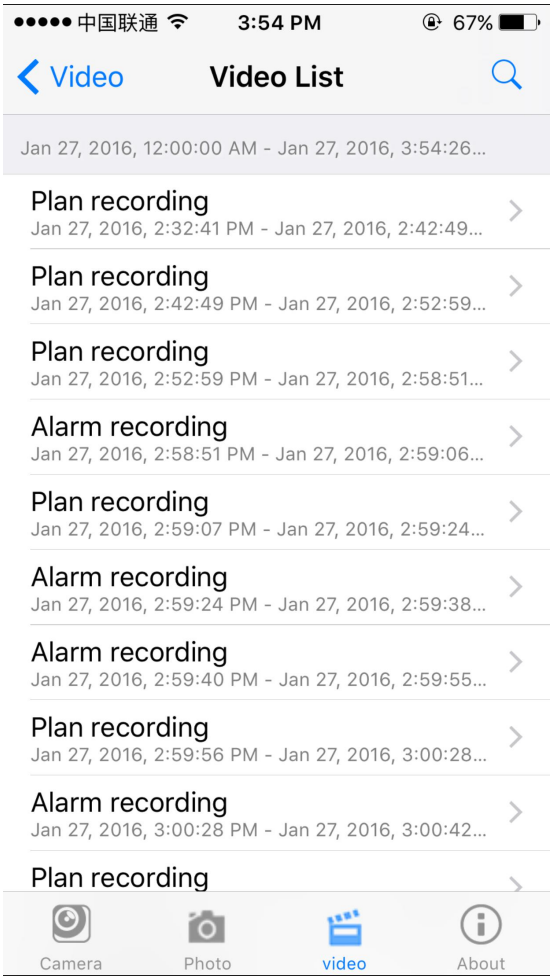
Note 2: The local video and remote video viewing

1 Open the video bar navigation bar.

2 in the upper right corner to select local and remote video viewing

(Standby: Remote is a camera TF card to store video)





3 Click Camera ID can consult local / remote recording (see below)
